

For more than a century, we have been shaping progress in our product sector as technology leader – whether it's starter motors, generators, start/stop systems or mild hybridization. Innovation, development expertise and the highest quality standards make us a reliable partner for automotive manufacturers – at 16 locations worldwide. Our products are not only efficient and durable, but also provide high functional flexibility and the right answers for global product platforms and more stringent CO₂ requirements.

Purchase Quality Engineering – Engineer / Senior Engineer

Join us in shaping the future of mobility. And yours.

You are there when we work together to shape the future of mobility! Become part of our interdisciplinary, international team at the location in Bengaluru, India

How your future looks like with us

- Process expert for sub-assemblies, both Mechanical and Electromechanical sub-assemblies.
- process development of sub-assemblies at supplier for all new developments in line with agreed processes and established controls.
- Analyze and troubleshooting support for critical Quality issues at suppliers.
- Strong process knowledge of assembly processes on electrical and electronic assemblies
- Competence in Welding processes – Resistance and TIG welding, Electrical assembly processes, EMS awareness

What we will offer you in the future

- Innovation and scope for growth
- International exposure
- Excellent working atmosphere

What you bring with you for a future with us

- Experience – 5-7 years in manufacturing process/ Development of sub-lines.
- Prior experience from automotive electrification industry preferred Education qualification: B E with Electrical and Electronics
- Knowledge of Electrical / Electronic functions is preferable
- Niche Skills- Vendor development (process development) in sub-assembly areas (mechanical and electro-mechanical)
