

For more than a century, we have been shaping progress in our product sector as technology leader – whether it's starter motors, generators, start/stop systems or mild hybridization. Innovation, development expertise and the highest quality standards make us a reliable partner for automotive manufacturers – at 16 locations worldwide.

Our products are not only efficient and durable, but also provide high functional flexibility and the right answers for global product platforms and more stringent CO₂ requirements.

Software Testing Engineer

Join us in shaping the future of mobility. And yours.

You are there when we work together to shape the future of mobility! Become part of our interdisciplinary, international team at the location in Bengaluru, India

How your future looks like with us

- Responsible for execution of task assigned by international team .
- Understand the requirements of clients, designing test cases and automate test scripts.
- Responsible for testing customer requirement and generating reports.
- Coordinates with international team members for successful execution of the project.
- Communicate Clearly on Task status and ensure delivery on time.
- Establish good relation with clients and international team.
- willing to set-up and develop the organization for engineering services.

What we will offer you in the future

- Innovation and scope for growth
- International exposure
- Excellent working atmosphere

What you bring with you for a future with us

- Automotive Embedded Software testing experience : 6+ years and Prior experience from automotive electrification/Embedded/Avionic industry preferred.
- Worked as Test automation Engineer at least for 3 years and handled 2-3 in automation frameworks
- Education qualification: B E with Electrical and Electronics Engineer or B.E with Electronic and communication engineering.
- Understand the product requirement and test automation requirement (especially for regression testing, stress testing and long run reliability and stability testing).
- Technical competencies Define, implement and maintain test automation framework. And Test specification preparation as per test plan, ISTQB Foundation course Experience in dSPACE, Automation Desk, Control Desk.
- Integration testing for the SW components. Test script development in Perl/Python..
